

Advanced Technologies for Industry Technology Watch Reports

Exploring upcoming technologies that are characterised by a high speed of evolution and a disruptive potential

The Advanced Technology Watch

The Advanced Technology Watch report series is meant to play a complementary role to the other analytical, policy and statistical reports of the project, by focusing on the market, business and socioeconomic trends driven by technology innovation. The Advanced Technology Watch reports therefore encompass a whole set of advanced technologies that are a priority for European industrial policy. These technologies enable process, product and service innovation throughout the economy, thus fostering industrial modernisation.

What topics to expect in the Advanced Technology Watch reports:

Technology Landscape

The Technology Landscape includes a brief overview of the uptake of identified advanced technologies and demand trends by industry, setting the scene for the rest of the report.

Technology Focus

The second part of the Advanced Technology Watch reports builds on the Technology Landscape but brings more focus by exemplifying an in-depth analysis of one advanced technology, selected because of its relevance in terms of emerging business opportunities and disruptive potential.

Technology Focus on Artificial Intelligence
